Erratum: Structural and optical properties of MgGa₂Se₄ and MgGa₂Se₄:Co²⁺ single crystals

Hyung-Gon Kim, Wha-Tek Kim, and Yong-Geun Kim

On page 9469, in the Abstract, line 5 from the bottom should read $^4T_2(^4P)$ not $^4T_1(^4P)$.
On page 9469, in the Abstract, lines 3 and 4 from the top should read ... with lattice constants $a = 3.950 \, \text{Å}$ and $c = 38.893 \, \text{Å}$ with a hexagonal transformation for MgGa₂Se₄, and $a = 4.203 \, \text{Å}$ and $c = 38.475 \, \text{Å}$ for MgGa₂Se₄:Co²⁺ single crystals.
On page 9470, in Fig. 1, the bottom part should read $a = 4.203 \, \text{Å}$, $c = 38.475 \, \text{Å}$ not $a = 3.950 \, \text{Å}$, $c = 38.893 \, \text{Å}$.
On page 9470, in the left column, the second paragraph should read: The lattice constants obtained from Fig. 1 are given by $a = 3.950 \, \text{Å}$ and $c = 38.893 \, \text{Å}$ for MgGa₂Se₄ and $a = 4.203 \, \text{Å}$ and $c = 38.475 \, \text{Å}$ for MgGa₂Se₄:Co²⁺ single crystals. These values are reasonable compared with $a = 3.88 \, \text{Å}$ and $c = 38.34 \, \text{Å}$ of the MgGa₂Se₄ compound.¹
On page 9473, in the conclusion of the left column, line 5 should read ... $a = 3.950 \, \text{Å}$ and $c = 38.893 \, \text{Å}$ of hexagonal transformation for MgGa₂Se₄, and $a = 4.203 \, \text{Å}$ and $c = 38.475 \, \text{Å}$ for MgGa₂Se₄:Co²⁺ single crystals.

Erratum: Selective adsorption in $^4$He-MgO scattering

Massoud Mahgeresteh, David R. Jung, and Daniel R. Frankl

The caption to Fig. 2 should read “centered at $-G_{nn}$.” The label in the same figure should be $G_{11}$ not $G_{11}$.

Erratum: Excitonic transitions in strained-layer InₓGa₁₋ₓAs/InP quantum wells

D. Gershoni, H. Temkin, M. B. Panish, and R. A. Hamm

As a result of several typographical errors in the preparation of our manuscript Eqs. (5) and (7) are incorrect. Equation (5) should read

$$\Delta \left[ \frac{1}{m_{\text{LH}_1}(x)} \right] = \frac{1}{4} \left[ \frac{1}{m_{\text{LH}_2}(x)} - \frac{1}{m_{\text{HH}_2}(x)} \right] \left[ \frac{1 + 9X}{(1 + 2X + 9X^2)^{1/2}} - 1 \right]. \quad (5)$$

Equation (7) should read

$$E'(E' - E_g)(E' + \Delta) - K^2P^2(E' + \frac{3}{2}\Delta) = 0. \quad (7)$$

These errors do not change the content of the paper as the original calculations were done with the correct equations. We thank S. K. Sputz-Alexander for pointing out these errors.
